

Class: Fourth Class **Week beginning:** Monday the 25th of January,

Hi everyone,

I hope you all had a lovely weekend and enjoyed last week. The layout is the same this week and we have our zooms on Tuesday, Wednesday(Ali) and Thursday at 1:30. This week we will also have assembly on Friday (The 29th of January) Ms. Coen will send you the link to the zoom meeting ☺

This week is also Catholic School's week - I have included an activity for you to celebrate this, Some students have been sending me their work in bulk (altogether) on one day during the week. This is perfect. Just a reminder girls to check what you need for your zoom meetings before attending as it can waste time on others if we are waiting for students to gather their equipment,

Thanks for all your patience and your hard work. See you during the week for our zoom calls.

Ms. Eagers

Chaffinch

Robin

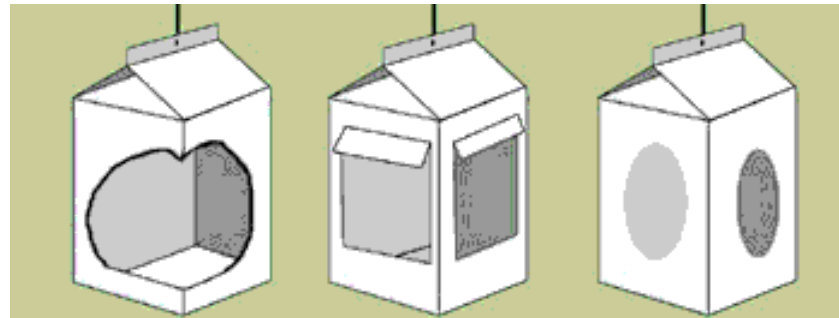

Goldfinch

Making Bird Feeders

Good feeders let birds feed in ways that match their natural way of feeding. Some birds use feeders often, others hardly ever use them.

Making feeders work

You can make simple feeders from cardboard milk cartons *or* plastic drinks bottles.

Invent your own and use them for experiments on:

- Feeder Design

Blue Tit

▪ How birds see things

The way in... (Feeder Design)

Design and make feeders which let birds reach the food in different ways.

The feeders should be the same size and colour so that it is the design (the way to the food) that is being tested.

Evaluating the feeders (Did they work?)

- Did the birds use your feeders?
- Do different birds like different designs?
- Is the feeder they choose like their natural way of finding food?
- Which designs seem to be best for bird feeders?
